SUMMARY

Final-year Computer Science student and former Data Analyst Intern who enjoys building practical solutions to real-world problems, from a Rust/WebAssembly security sandbox to a full-stack AI contract analyser and Unity games. Quick to learn, with strong problem-solving and communication skills, comfortable working in teams, and focused on clean, tested, well-documented code.

EDUCATION

B.Tech, Computer Science & Engineering | SAITM, Gurugram (affiliated to MDU, Rohtak) *2023 - 2027*

PROJECTS

CodeCage - Secure WebAssembly Plugin Sandbox | Rust, Wasmtime, WASI, GitHub Actions, HTML/JS
github.com/Deepanshu16125/codecage

- Final-year project: a Rust host on Wasmtime that runs untrusted WebAssembly plugins **deny-by-default** (no file, env or network access) with CPU (fuel), memory, timeout and output limits, per-plugin TOML policies, SHA-256 hash pinning, an audit log and a live HTML/JS dashboard.
- Tested with **14 plugins in Rust and C** (**10 attacks, all contained**): **26 automated tests** and **19/19 scenarios** pass in **CI/CD on GitHub Actions** (Windows and Linux), shipped to v1.0 with tagged releases, a CHANGELOG and full documentation.
- Benchmarked: **1.43x native** speed for a CPU-heavy plugin, **~5.5%** fuel-metering cost, and a compile cache that cuts start-up **3x** (28.5 to 9.4 ms).

ClearClause - AI Legal Contract Analyser | Next.js, TypeScript, Tailwind CSS, FastAPI, Python, OpenAI API
github.com/Deepanshu16125/clearclause-backend

- Built a full-stack app: a **Next.js (React/TypeScript)** frontend with Tailwind CSS talking to a **FastAPI** REST backend that parses contract PDFs up to **15 MB** with PyMuPDF and PyPDF2.
- Integrated **gpt-4o-mini** with JSON-mode structured prompts to return a contract summary, a **0-100 Fairness Score** and per-clause HIGH / MEDIUM / LOW risk ratings.
- Turns legal jargon into plain-English explanations and negotiation suggestions, visualised as a risk dashboard.

Bloom's Flower Shop | HTML, CSS, PHP, React github.com/Deepanshu16125/Blooms-flower-shop

- Developed a full-stack flower shop website with a product catalogue, category navigation, dynamic pages and user interactions.

Modular Movement & Environment Prototype | Unity, C# github.com/Deepanshu16125/Modular-Movement-System

- Developed a modular, physics-based character movement system and optimised 3D environments in Unity and C#.

Burnout Rush - Arcade Racing Game | Unity, C# github.com/Deepanshu16125/Burnout-Rush

- Designed and built a Unity racing game with 5 tracks, AI opponents, split-screen 2-player mode and a playable Windows build.

EXPERIENCE

Data Analyst Intern | QAwD *Jan 2026 - Jun 2026*

- Cleaned and validated **50,000+ production data records**, improving data accuracy and consistency.
- Processed and analysed large datasets with Python and SQL, applying data cleaning and feature engineering.
- Identified and resolved data quality issues to support reliable reporting and analysis.

SKILLS

Languages: Rust, Python, TypeScript, JavaScript, C, C++, C#, SQL, HTML/CSS
Frameworks/Runtime: React.js, Next.js, Node.js, FastAPI, Tailwind CSS, Wasmtime/WebAssembly, Unity
Data: MySQL, data cleaning, feature engineering, data analysis
Tools: Git, GitHub, GitHub Actions (CI), OpenAI API, PowerShell

ACHIEVEMENTS & EXTRA-CURRICULAR

Achievement: 3rd place at Innoviz, college innovation event (piezoelectric energy system).
Event Coordination (Aug 2024 - May 2026): helped organise Deepotsav 2025, Cultural Fest 2026, Convocation 2026, Zeal 2026.

CERTIFICATES

- Web Development - Coding Blocks
- Java Programming Certification - Kreativan Technologies
- Big Data - Samsung Innovation Campus
